

Successful cabinet rollout ep_00100 — policy execution t=25

12 history observations; policy executes 25 actions open-loop; terminal success at t=467 (442 steps from this decision)

Initial-frame padding Real past observation Current observation

Each column is one observation: agent view (top) + wrist view (bottom).

Successful cabinet rollout ep_00100 — policy execution t=225

12 history observations; policy executes 25 actions open-loop; terminal success at t=467 (242 steps from this decision)

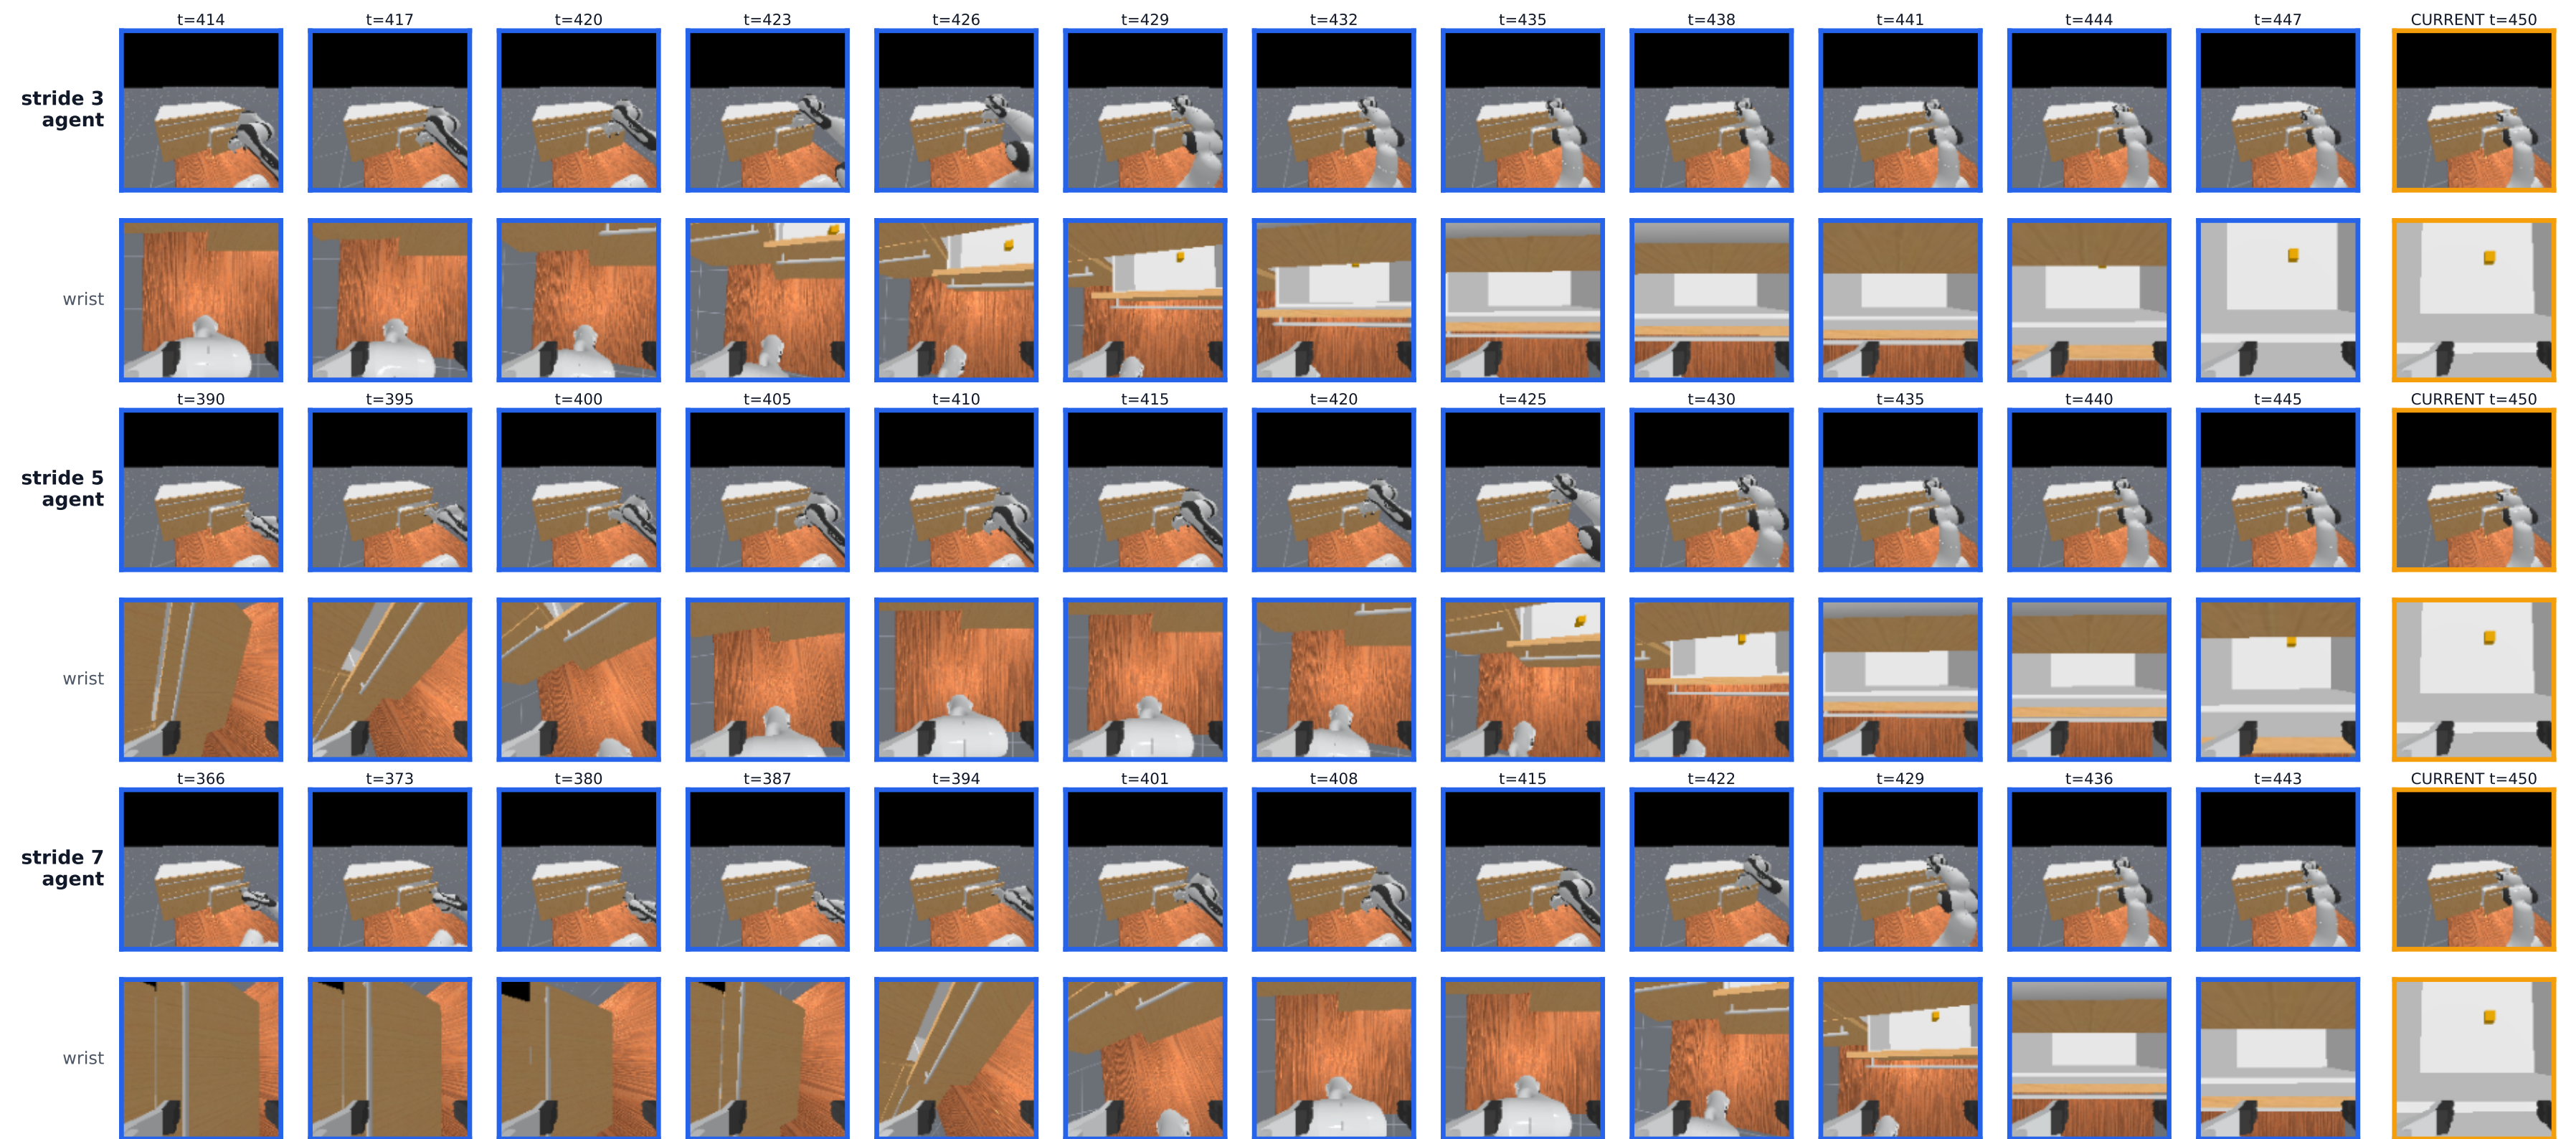

Initial-frame padding Real past observation Current observation

Each column is one observation: agent view (top) + wrist view (bottom).

Successful cabinet rollout ep_00100 — policy execution t=450

12 history observations; policy executes 25 actions open-loop; terminal success at t=467 (17 steps from this decision)

Initial-frame padding Real past observation Current observation

Each column is one observation: agent view (top) + wrist view (bottom).

Successful cabinet rollout ep_00100 — terminal transition t=467

Diagnostic view only: obs t=467 is before the terminal action; the green column is its post-action next observation with reward +1. The deployed policy was last queried at t=450.

Initial-frame padding Real past observation Current observation Post-action success

Each column is one observation: agent view (top) + wrist view (bottom).
